Re: Letter of Commitment regarding County Interior Drainage Analysis Study

Dear Mr. Balliew:

In order to meet the Federal Emergency Management Agency (FEMA) requirements as it relates to the accreditation process of the levees, we are requesting to partner with El Paso Water for the use of On-Call Professional Engineering Services for a County Interior Drainage Analysis Study that is required for the certification of County levees. The cost for this effort has been identified at \$137,279.00 and all costs associated with this effort will be assumed by the County of El Paso.

Your immediate attention to this matter is greatly appreciated. Should you have any questions please do not hesitate to contact me at (915) 546-2098. Thank you in advance for your consideration and handling of this request.

Sincerely,

Ruben Vogt
El Paso County Judge
