INFRASTRUCTURE NOTES:

ADMINISTRATION EVALUATION:

No Objections

EVALUATED BY:

Ruben Ocampo

ADMINISTRATION NOTES:

This evaluation with the completed signed direction to proceed denotes that the Information Technology Department (ITD) and all its divisions have had the opportunity to evaluate and review the noted technology. This process is provided at a level that is indicative of a general and foundational perspective. Generally, ITD works to ensure that all technology to be on-boarded and deployed at the County of El Paso is compatible with existing infrastructure/operating systems, does not introduce eminent security risks, offers extended support arms and is engineered with sustainable and scalable technologies. To note, this evaluation does not provide a comprehensive recommendation that measures the technology against similar products or guarantees that this technology will function in the manner that the requestor intends. A functionality analysis is the responsibility of the requestor to ensure that its features and functions align with the business processes and other system integrations defined by their respective governmental and regulatory areas of expertise.

A comprehensive evaluation that seeks to examine all aspects of a plan to research, procure and deploy technologies as well to include a functionality analysis is available at the behest of the requestor with an independent and explicit written and approved acknowledgment from the Projects Division of ITD.
